

# HIT 231 : Medical Coding Systems I Lab

Lab to accompany the Medical Coding Systems I - intended to develop an understanding of coding and classifications systems in order to assign valid medical codes. Instruction includes description of classification and nomenclature systems; coding diagnoses and/or procedures; sequencing codes; analyzing actual medical records to identify data elements to be coded; and validating coded clinical information. Student competency includes demonstration of coding principles and applications (manual and/or computer assisted).

**Credits** 1
