

# ADM 212 : INTERMEDIATE CATIA

## **Class Program**

Advanced Manufacturing Technology (ADM)

## **Credits**

3

## **Lecture Hours**

3

## **Lab Hours**

0

This course explores the techniques for using CATIA v5/6 to produce working level of engineering drawings. Detail and assembly drawings are created with attention focused on proper views, text, dimensions, tolerances, bills of material, borders, and title blocks. Weldments, flat patterns, and other special practices are also examined.

## **Prerequisites**

ADM 116
